

## Lead Discipline | Mechanical rotating Engineer

Job Reference	DJO_00006
Region/Site	DORIS Headquarters, Paris, France
Contract Type	Full time   CDI
Remuneration	According to profile and experience

At DORIS you will be joining a fast-moving and technically diverse environment. DORIS is unique and often takes engineering projects from feasibility to completion and beyond, developing innovative and optimized solutions for the Oil & Gas industry. We undertake an unusually wide range of work, offering variety, challenge and opportunities for original and innovative engineering that is tailored to the needs of each project.

We currently have an opportunity for a **Lead Mechanical Rotating Engineer** based in our **Paris** Headquarters Office.

### Job Description:

DORIS Engineering is looking for an experienced mechanical rotating engineer who should act as lead engineer on Oil & Gas and on Offshore Renewable projects.

Your range of activity will cover all markets addressed by DORIS: Oil & Gas, offshore and onshore engineering, green and brown field projects. Your scope of responsibilities will encompass engineering projects and discipline development.

#### Engineering projects

You will be involved in a large range of projects from conceptual phases to construction phases with a wide variety of activities, including but not limited to:

- Rotating Mechanical design of offshore topsides, onshore plant, subsea facilities (specification, data sheet, 3D model)
- Preparation and supervision of site survey, onshore and offshore
- Vendor technical follow-up including Request for Quotation preparation, technical clarification, and Vendor data review.

You will be responsible for the mechanical rotating studies performed in-house or the follow-up of subcontracted studies with direct communication with our clients/contractors.

You will liaise and cooperate with other DORIS technical disciplines (process, layout, 3D model, structure, electrical, instrumentation,...) part of your assignment on projects.

#### Discipline development

As lead of the mechanical discipline, you will participate in maintaining DORIS experience and adapt methodologies and knowhow to the evolution of state of the art and to the market needs. This includes involvement in R&D activities through internal studies, development of engineering tools, supervision of trainee.

### Qualifications & Requirements:

- M.Sc or equivalent with specialization in mechanical,
- Minimum 10 years' experience in offshore & onshore mechanical rotating engineering for Oil & Gas project,
- Experience shall cover the following type of equipment: generator, compressor, pumps, crane, handling, mechanical package such as chemical injection ...
- Experience at Vendor would be a plus,
- Fluent English - Good written (including report writing) and verbal communication,
- Familiar with 3D model viewer software Naviswork
- Good working knowledge of applicable regulations, codes of practice, international standards
- Mobility required in particular for collaboration with foreign DORIS subsidiaries and participation to surveys in France and abroad, offshore and onshore.

### Your application:

Please send your CV and cover letter on DORIS Engineering Web Site.

*We would like to take this opportunity to thank you for your interest in this vacancy. Your application will be carefully considered during the initial screening process. Unfortunately due to the high volumes of applicants we may not be able to personally respond with everyone that applies but we will contact you if you are selected to progress in the recruitment process.*
